

■ CORPORATE PROFILE

Intelligent Asset & Operations Management

HSE Equipment Compliance. Asset Management.
Operational Control — All in One Platform.

WHO WE ARE

One platform for equipment compliance

Calitrak is a cloud-based equipment compliance and asset management platform designed for safety, industrial hygiene, environmental monitoring, and gas detection programs. It helps organizations streamline workflows, maintain regulatory compliance, and ensure complete asset traceability through digital solutions.

- **Centralized digital platform**
- **Automated compliance workflows**
- **Real-time visibility and traceability**

Deliver measurable operational improvements

By replacing manual processes with standardized digital workflows, organizations can improve efficiency, strengthen compliance, and reduce administrative effort.

80% Faster audit prep

Spend less time preparing documentation for audits and inspections.

Reduces documentation time for audits/inspections.

Save 10+ hours/week

Automated workflows eliminate manual administrative tasks.

Generate calibration and inspection certificates online.

Near real-time equipment visibility

Addresses overdue devices and service readiness.

Fewer overdue devices, ready and in service.

100% Record traceability

Complete digital history for every asset and activity.

Illustrative outcomes. Actual results vary by organization and implementation.

The complete equipment lifecycle

Asset registration

Central register for every device

Calibration scheduling

Due dates and automated reminders

Inspections

Structured, repeatable checklists

Maintenance

Service records and work history

Equipment assignments

Who holds what, and where.

Gas detection

Check-out, check-in & bump tests

Real-time status

Automated notifications

Complete audit trails

Audit-ready by design

Centralize all compliance records in one secure platform. Store calibration certificates, inspection reports, service records, and manuals while replacing paper files and spreadsheets with fully traceable digital records.

- **Instant equipment status**
- **Automated compliance alerts**
- **Complete audit trail**

Document vault

Centralized compliance documents

Audit trails

Complete audit history

Notifications

Automatic reminders before due dates

Compliance ready

Evidence ready for inspections

Real-Time control over critical consumables

Real-time visibility and smart alerts — keep critical consumables in stock and fully compliant.

Calibration gases

Monitor gas inventory, cylinder levels & expiry dates

Detection sensors

Track sensor lifespan, installation dates & replacement cycles

Filters & spares

Maintain optimal stock of replacement parts & filters

Stock & expiry

Smart alerts for low stock, expiry, and reorder points

Inventory visibility • Expiry monitoring • Supplier traceability • Usage history

Calitrak Pro - Built for multi-site operations

Scale equipment management, compliance, and reporting across multiple sites and clients from one secure cloud platform.

Multi-site operations

Manage equipment, compliance, and workflows across all locations from a single platform.

Multiple clients

Securely serve multiple client organizations with isolated records, users, and reporting.

Role-based access & data isolation included

Centralized reporting

Generate consolidated compliance, asset status, and KPI reports for leadership.

One platform. Unlimited sites. Unlimited clients. Complete visibility.

MARKETS WE SERVE

Made for asset-intensive industries

- Industrial
